## Samples

Samples of my web design and web application work are available [here](#)

## Work Experience

March 2002 - Present      Butch Harmon School of Golf      Henderson, NV

### Technical Director

Research, design, create, implement, and troubleshoot internet-based and client-side applications for use within the office. Internet and Intranet applications include inventory management system, client billing and invoice system, online reservation system, custom club fitting system, and club ordering system. All were designed using the languages and technologies of ASP, JavaScript, Java, Visual Basic, VBScript, SQL Server, and MS Access. Advanced networking and security implementation also created. Designed and developed all back-end logic, front-end interfaces, business objects and page controllers.

Also designed and created all content and graphics for Butch Harmon School of Golf website (<http://www.butchharmon.com>) including streaming video using Microsoft Media Streaming Server and eCommerce capabilities. All internal office applications were integrated into the website to keep information at a real-time status.

Traffic to the Butch Harmon School of Golf website **tripled** in total hits per month and **doubled** in total unique visitors per month since designing new website.

Aug 2001 - Mar 2003      Accenture      Chicago, IL

### Financial Services Solution Center Analyst

Research, design, implement, and test internet-based applications for companies in the financial services industry. All technology is internet-based using such languages as ASP, XML, Java, Visual Basic, and forms of .NET. Examples of work done in the solution center include web-based portals and online banking systems.

Summer 1998, 2000      BPS Internet      Marion, IN

### Network Technician, Computer Maintenance & Support Representative

Provided technical support to customers as well as the design for the home page (<http://www.bpsinet.com>). Worked with network installation and remote computing between the two offices in Tulsa, OK and Marion, IN. Built systems and servers for customers from scratch. All ISP systems ran on a UNIX or NT platform.

January 2000      JobOptions.com, LLC      Indianapolis, IN

### Information Technologies Help Desk Intern

Provided support to client representatives throughout country, as well as support on internal network in the Indianapolis and Cleveland offices. Support included software and hardware maintenance and troubleshooting of Windows NT servers and client workstations.

1998 - 2001      DePauw University      Greencastle, IN
